Lay-Buys payment solution is easy to install on Wordpress framework.

Merchants have to perform following Steps:

1. Download “WooCommerce - excelling ecommerce”
2. Install “WooCommerce - excelling ecommerce”
3. Download “PUT IT ON LAY-BUY (powered by PayPal)”
4. Register at <https://lay-buys.com/> as merchant
5. Install “Lay-Buys Payment Gateway Extension for WooCommerce”

Step 1: Download “PUT IT ON LAY-BUY (powered by PayPal)”

- Download the latest package from

Step 2: Register at lay-buys.com as merchant

- Sign-up on <https://lay-buys.com/vtmob/register.php>

- Then fill your PayPal credentials (see account page)

The screenshot shows the Lay-Buys Virtual Terminal interface. At the top, the logo "lay-buys virtual terminal" is displayed with the tagline "secure cloud-based mobile payments". To the right is a circular logo with a handshake and the text "VIRTUAL TERMINAL" and "secure cloud-based payment platform online for BUYERS and SELLERS". Below the logo, there is a sidebar with navigation links: "Enter Sale as the Seller", "Enter Sale as the Buyer", "View Payments In", "View Payments Out", "Update Your Details", "Your PayPal Details", "Change Password", and "Log Out". The main content area contains a form for entering PayPal details. The form has a "Member ID" field with the value "00000". Below it are three input fields for "Paypal API Username", "Paypal API Password", and "Paypal API Signature". An "UPDATE" button is located below the form. At the bottom of the form, there is a text box with instructions: "Please go into your PayPal account and follow following process: Click on 'PROFILE', then click on 'MY SELLING TOOLS' then click on 'API ACCESS', then click on 'View API Signature'. Then simply copy and paste into the VT section of 'Your PayPal Details' the following: API Username, API Password and Signature. (If you do not have a Signature and only a certificate, please contact us)".

Step 3: Installing and Activating “PUT IT ON LAY-BUY (powered by PayPal)”

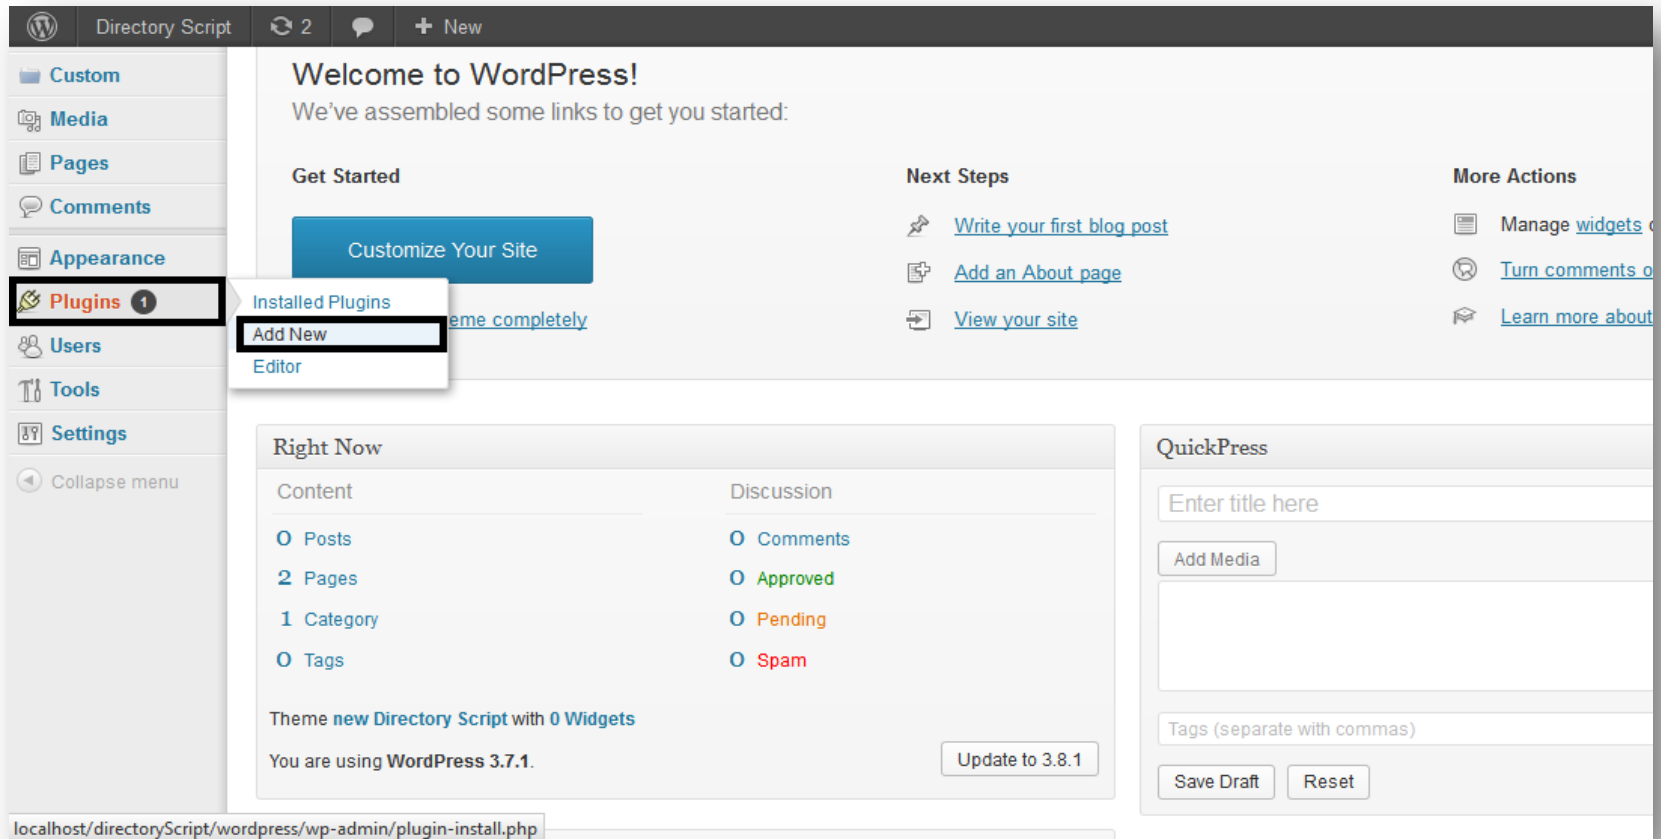

- Upload plugin folder to your server
e.g. /public_html/wp-content/plugins/
- Now go through admin panel and activate the plugin
Step 1 - Go through menu "Admin >> Plugins",
Step 2 - Click on [Activate] link under “Lay-Buys Payment Gateway Extension for WooCommerce”,

<input type="checkbox"/>	Lay-Buys Payment Gateway Extension for WooCommerce Activate Edit Delete	Lay-Buys Payment Gateway Extension allows you to securely make payments through Lay-Buys.

At Checkout Page in Front-end:

Payment Method Step

Lay-Buys Payment method appears on checkout page when a buyer checkout the order.

When a customer choose “PUT IT LAY-BUY powered by PayPal” payment method as their payment option in payment step under checkout page, then customer have to choose the instalment plan for his/her payment by choosing some down payment percentage and choose months for creating instalment payment for 1,2 or 3 months at “Confirm Order” step.

Step 1: Fill in all the billing details:

The screenshot shows the 'Checkout' page with a coupon field at the top. Below it, there's a checkbox for 'Ship to billing address?' which is checked. The main form is divided into 'Billing Address' and 'Shipping Address' sections. The 'Billing Address' section includes fields for Country (United States), First Name (test), Last Name (test), Company Name (Cedcoss technologies), Address (123 my street), Town / City (my city), State (California), and Zip (91086). The 'Shipping Address' section includes an 'Order Notes' field. A yellow callout box with a red arrow points to the 'Billing Address' section, containing the text: 'Step 1: Fill the billing information for WooCommerce records'.

3. Use as Payment Option

Step 2: Select “PUT IN ON LAY-BUY powered by PayPal”

1. Select payment option

2. Select initial payment percentage

3. Select months to pay

4. Review payment plan

5. Click to place order

Direct Bank Transfer

Cheque Payment

PayPal

PUT IT ON LAY-BUY powered by PayPal

Lay-Buy is an affordable payment plan option that allows you to pay-off a product or service via one down payment, with the balance paid over 1, 2 or 3 monthly instalments. Your purchase is delivered to you after the final instalment payment is completed

Please Choose Your Payment Plan

Initial Payment: 20% Months To Pay: 3 months

PAYMENT	DUE DATE	AMOUNT
Down Payment	Today	\$0.40
1	Feb 1, 2014	\$0.53
2	Mar 1, 2014	\$0.53
3	Apr 1, 2014	\$0.53

Your goods/services will be delivered once your final payment has been received

Place order

3. Use as Payment Option

Here customer can choose any plan for payment by choosing Initial Downpayment percentage and Months for next instalments.

After reviewing a plan user can place order by clicking on “Place Order”.

This button places the order on WooCommerce and then redirect to PayPal for payment .

Instead of paying all the amount (grand total of order), customer have to pay the down payment amount and then a recurring profile is created on PayPal for next payments.

On successful payment a success page will appeared at WooCommerce website by showing success information and on failure order will not be placed and show ‘My Account’ page for retry.

4. Lay-Buys Instalment Reports

Lay-Buys Instalment Reports are the transaction reports which contain all the information related to Lay-Buys detail, PayPal transaction detail, customer detail, order detail and instalment detail. When a customer choose Lay-Buys payment option as their payment method in payment step under checkout page, then customer have to choose the instalment plan for his/her payment by paying some down payment and create instalment payment for 1,2 or 3 months.

So every transaction will be stored in WooCommerce website and can be managed form a panel called “Lay-Buys Instalment Reports”.

Please go to admin panel -> WooCommerce -> Lay-Buys Instalment Reports

Step 1: Click on 'WooCommerce'

Lay-Buy Instalment Reports

Select

Column-wise description:

- **Created At** is a date field that stores that date when transaction was created.
- **Order** is the order id related to the transaction.
- **Amount** is the grand total of order.
- **Down Payment %** is the percentage of down payment.
- **Months** is the total no of instalment cycles.
- **Downpayment Amount** is the down payment amount (calculated from down payment %) paid at time of order placing.
- **Payment Amounts** is the next instalments amount.
- **First Payment Due** is the date of first payment.
- **Last Payment Due** is the date of last payment.
- **Status** is the status of transaction. It may be Pending/Completed/Cancelled/Revised Request/Revised

When a transaction have pending instalments then its status will be “Pending” , if transaction have no pending instalments means all instalments have been paid then its status will be “Completed”. If transaction is cancelled due to some reason then its status will be “Canceled”.

Admin can revise the instalment scheme by sending a request mail to buyers, so when a transaction is just requested then its status will be “Revise Requested” when buyers accept and process the transaction then its old transaction get a status that is “Revised” and a new transaction row will appear for same order with a status “Completed/Pending”.

Detailed explanation about Status is done in next topics.

Fetch Updates is the functionality for fetching the latest report of instalments from <http://lay-buys.com>.

At “Lay-Buy Instalment Reports” panel, there is a button at top-right corner named as “Fetch Updates”.

Fetch Updated send a request for all transactions which have Pending status.

On success a ‘success message’ appears with count of total rows fetched in message area as:

Fetches 1 report rows from 'https://lay-buys.com/report/.'

Email

upasnaupreti@cedcoss.com

Note: Only a Pending Transaction can be revised.

The Revise form contains the some information as editable and some of them read-only. Like, Reference Information doesn't need to be edited so such fields are read-only and are used for reference on revising process.

Total Amount is the amount available for revising process, generally it is calculated by formula

$$\text{Total Amount} = \text{Grand Total of order} - \text{Total Paid Amounts}$$

Where, Total Paid Amounts = Down Payment + (no of completed instalment * Payment Amounts)

Payment Type is the method of next payment. It may be Lay-Buy or Buy-Now.

- **Lay-Buy:** It create a new recurring profile for balance amounts. And cancel the current profile.
- **Buy-Now:** It's the method of paying all the balance amount at one time without any instalment plan. So when customer want to pay all the balance amount in one time then admin can choose this method for current customer.

Initial Payment* is the down payment percentage for new plan.

Months to Pay * is the no of instalment cycles for new plan.

Preview* is the preview of your plan depend upon Initial Payment and Months to Pay fields.

Email (*read only*) is the email of customer. It must be same throughout WooCommerce, Lay-Buys and PayPal. And it is an important key for identifying the customer's data on Lay-Buys and PayPal so it can't be changed from here.

*visible on "Lay-Buy" option, if "Buy-Now" is selected these fields get disappeared because Buy-Now is onetime payment method so there is no need of instalment information.

After choosing new plan click on “Save and Send Email to Buyer” button for submitting the request and send a mail to customer. Also current transaction status becomes “Revise Requested”. After success a message will appear with message “Request has been saved and email was sent to <customer_email> for order #<order_id>”.

According to “Payment-Type” the process of revision will work.

Progress for “Lay-Buy” Method:

- **Email Structure:** see example format

Lay-Buy Financial Solutions Pty Ltd

There are five kind of transaction statuses as:

1. Pending,
2. Completed,
3. Cancelled,
4. Revise Requested, and
5. Revised.

Pending when there is at least one instalment is pending or revise by Lay-Buy method.

Completed when all the instalment get paid or revise by Buy-Now method.

Cancelled when instalment is not paid at right time or manually canceled by admin as “Cancel Transaction”.

Revision Requested when a transaction gets just revised not completed by customer.

Revised when customer responds for Revise Request transaction then old transaction becomes “Revised”.

Thank you!
